The Brightest GameDev Event in Central Asia - cagameshow.com Hello friends! I am the CEO and founder of the largest GameDev conference and game exhibition in Central Asia - Central Asia Game Show. In 2020, we held our biggest conference, and in 2023, my team and I plan to make Central Asia Game Show a historic event for the Kyrgyz Republic. We have invited the brightest representatives of the GameDev industry to present their speeches for the first time in the capital of the Kyrgyz Republic - the city of Bishkek! Among the important topics are "The Absence of the Kyrgyz Republic for Developer Console in Google Play," as well as investment and development-related questions and motivation for game studios. And yes, game studios from Central Asia have the opportunity to showcase their games at no cost, making the game exhibition a large and exciting event for the press and attendees. Central Asia Game Show is also changing its venue and will take place at the "Dasmia" Cultural and Entertainment Complex in a massive building inspired by the traditional yurt - "Khan-Tenir." Main Event: DBillions Project Presentations DBillions Team: The Musical-Educational Project for Children that has amassed over 40 billion music video views on YouTube. The team promises to deliver the most vibrant presentation of educational children's games and apps under the DBillions brand. Currently, the DBillions team is preparing for their first large-scale concert on June 1st, which will also take place in the capital of the Kyrgyz Republic, Bishkek, and expects the participation of over 50,000 spectators. This concert marks the beginning of DBillions' world tour. I am incredibly excited that DBillions will be the main highlight of the new Central Asia Game Show 2023, helping the industry enter the global market. AVA Music: Premiere of New Projects Made in Kyrgyz Republic For the first time at the Central Asia Game Show exhibition, there will also be booths of music and sound recording companies. Talented and outstanding composers will be eager to offer game producers new solutions in creating game soundtracks and localizing games into different languages. AVA Music is one of the newest companies in the Kyrgyz Republic. Dear friends, despite all the challenges, I sincerely believe in the development of the Central Asia region. In each unique country of this region, there are undoubtedly talented and wonderful people, along with numerous unique stories and a rich treasure trove of folklore and other culturally rich assets yet to be discovered by the world. For example, the Kyrgyz Republic has the unique epic of "Manas," and there are already proactive indie developers who are starting to create games based on this masterpiece.
